ScaleCapacity | aws

Streamlining invoice management

ScaleCapacity uses generative AI to help Diversified Waste Solutions analyze large quantities of invoices and provide real-time feedback to users

AWS AI COMPETENCY PARTNER

MEET THE PARTNER

ScaleCapacity

ScaleCapacity is an AWS partner that designs, builds, and optimizes AWS cloud services. We've modernized more than 100 enterprise applications for public and private sector companies, handling all aspects of application and infrastructure transformation from education and strategy development to complex deployments and ongoing operational management.

aws PARTNER AI Competency

ScaleCapacity is an AWS AI Competency Partner, a select group of AWS Partners that have shown technical proficiency and a track record of continuing success while implementing generative AI technology powered by AWS. These partners undergo rigorous technical and commercial vetting by AWS Partner Solution Architects, providing customers a consistently high-quality experience.

SUCCESS STORIES

Using generative AI to better manage data

ScaleCapacity partnered with Houston Public Works to develop an AI chatbot to more efficiently retrieve information. The solution reduced delays in pipeline maintenance, minimized errors, and improved collaboration.

Making a website more customer-friendly

Plastics Innovations worked with ScaleCapacity to improve customer experience on its website, adding an AI chatbot with automated content updates and tailoring information based on user preferences.

Maintaining order in the legal system

The Nebraska Judicial Branch chose ScaleCapacity to develop a better system for managing documents and evidence from more than 285,000 cases annually. The solution not only streamlined processes but enhanced security and compliance.

CASE STUDY: DIVERSIFIED WASTE SOLUTIONS

ScaleCapacity developed a GenAI-based Intelligent Document Processing (IDP) solution to help Diversified Waste Solutions analyze invoice data for unwarranted increases and service charges. The solution facilitates quick searches, performs calculations, and automates tasks such as invoice parsing and entry, savings generation, sending customer emails, and detecting price changes. Integrating multiple AWS services, the project took approximately six months and has saved the customer over 700 labor hours per month, resulting in an additional $150,000 in annual recurring revenue.

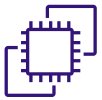

AWS TOOLBOX

Amazon Bedrock

The easiest way to build and scale generative AI applications with foundation models

Learn more

Amazon Elastic Compute Cloud (EC2)

Secure and resizable compute capacity to support virtually any workload in the cloud

Learn more

Amazon Simple Storage Service (S3)

Object storage service offering industry-leading scalability, data availability, security, and performance

Learn more

Amazon OpenSearch Service

Securely unlock real-time search, monitoring, and analysis of business and operational data using an open source solution managed by AWS

Learn more

TRANSFORMATION REALIZED

Generative AI helps Diversified Waste Solutions manage invoices more efficiently and effectively.

1,600+
invoices audited per month

100,000+
units served

BENEFITS

All access/authorization can be easily tied to organization's SSO solution

Entire application/solution resides in organization's AWS account

Data never leaves the AWS account

Allows for customer to be selective about LLMs

Encrypted solution (end-to-end)

All AWS services can be architected to align with organization's compliance requirements

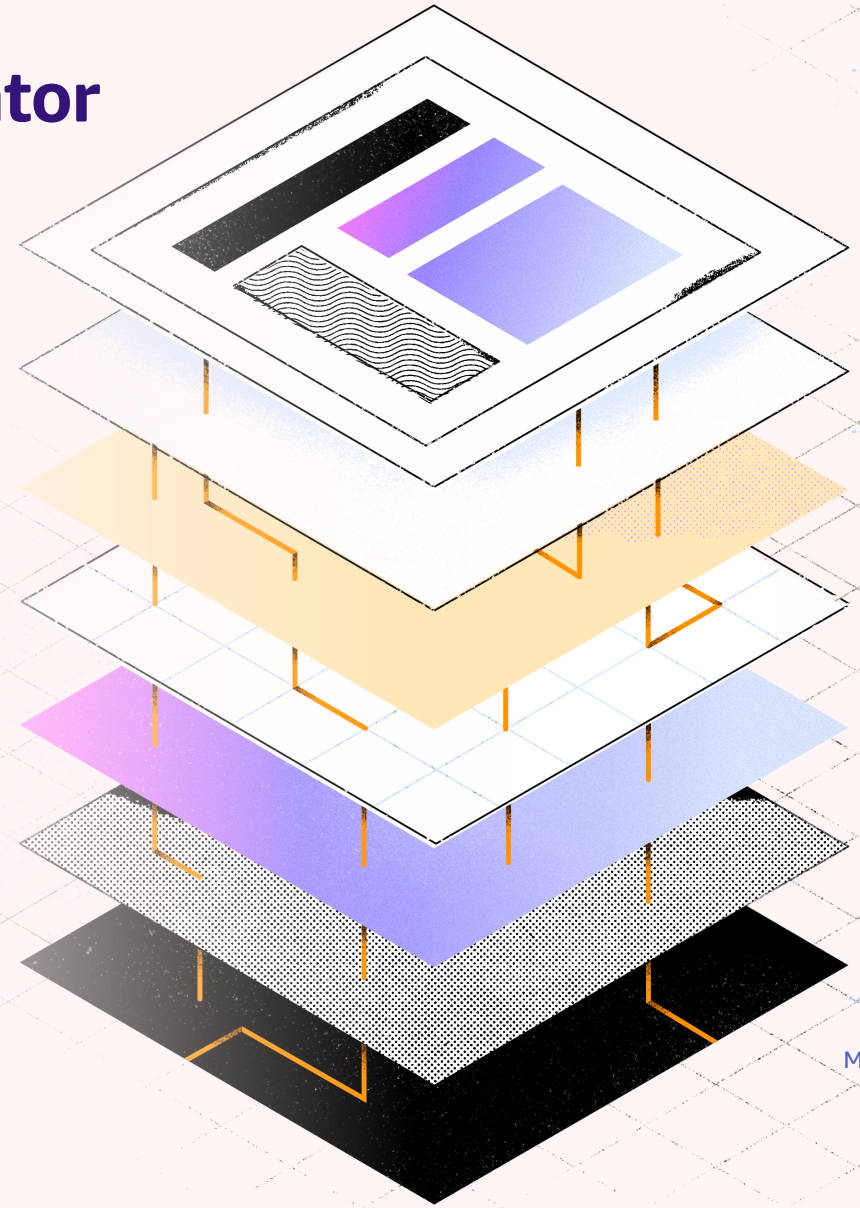

AWS

Use data as your differentiator

Easiest and most secure way to build and scale generative AI applications

Most performant, low-cost infrastructure for generative AI

Market leadership that becomes your competitive advantage
